lockers

Personal lockers - a place to call your own

1200 Series Personal Lockers are an essential component of the new office landscape, providing security for personal belongings. Dedicated personal lockers also provide a safe zone between what's coming in from the outside world and the mix of people that reside in the workplace.

As we advance the wellness protocols in the workplace, having fewer personal items at the workstation also enables housekeeping staff to clean and sanitize more effectively. Personal lockers can also be allocated to customers or visiting colleagues who need a place to leave an overnight bag or backpack during their visit.

Three or three hundred, a modular solution

1-column, 3-rows
3 individual compartments

2-columns, 3-rows
6 individual compartments

1-column, 2-rows
2 individual compartments

2-columns, 2-rows
4 individual compartments

1200 Series Personal Lockers are available in single and double width models and are fully modular with optional ganging hardware. Three high openings are very generous for the majority of applications. Two high openings provide a greater storage capacity for larger items like skateboards.

Steel cabinet cases are available in a wide range of durable and eco-friendly paint finishes. Thermally fused laminate doors are offered in both solid and woodgrain finishes, with right or left hinge openings. Interior steel shelves, accessory hooks, accessory rods and ganging hardware are all optional. Wayfinding numbers are available for installation on site.
